

**BD\_SW\_3BX\_12 (A/B)**

**Start – Stop/Run – Lap Set – 3 button handlebar race switch for fitting directly onto the brake clamp**

**Kawasaki ZX10R – 2016 onwards**

This switch is designed to replace the standard right side switch block on the ZX10-2016 bike and replaces the standard brake pump clamp using this switch body to save space on narrow race handlebars

The aluminium assembly has been designed ultra-slim and encompasses these waterproof switches:

- RED latching (Push On , Push OFF) for stop and run
- Blue momentary to replicate the Lap time Start function (and launch)
- Black momentary for engine starter

No modification of the bike wiring is necessary, this kit plugs directly into the 6 way connector of the standard loom,

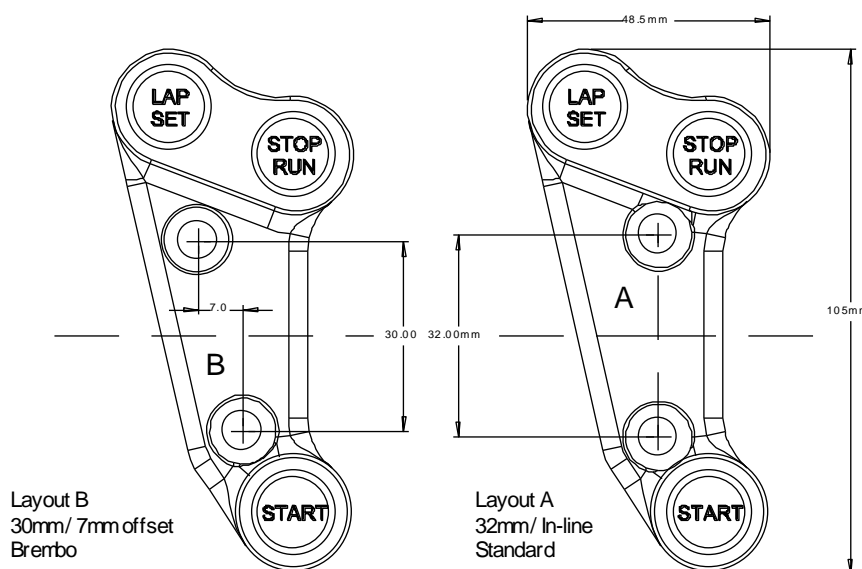

Two versions of this are available:

- Type A for standard 32mm spaced clamp bolts
- Type B for 30mm offset clamp bolts as found on some Brembo race products

**Function:**

Red	Run / Stop	Latching
Black	Starter	Momentary
Blue	Lap Set	Momentary

**Fitting note** – Tighten by hand the upper bolt first, then fully tighten the lower bolt, followed by the upper bolt. Use manufacturer recommended tightening torques.

**Electrical / Mechanical Characteristics**

Wire..... Type 55 / 24  
 Switch sealing..... IP67  
 Housing.....Aluminium  
 Coating..... Black anodise

Dia (handlebar) .....22mm (7/8")  
 Max width ..... 20.5 mm  
 Min width at centre ..... 13.5 mm  
 Weight ..... 95 g

**Ordering Information**

Part No.	Connector	Cable	Description
