

BD_SW_3B_15 Three button handlebar race switch Stop/Run, Start, DPL

- **Ducati V4 (2017 on)**

The aluminium assembly has been designed ultra-slim and encompasses these waterproof switches:

- Red , Stop/Run
- Black , DPL (launch)
- Green , Starter

No modification of the bike wiring is necessary, this kit plugs directly into the connector of the standard loom.

Note that the standard wiring is long enough to reach the switch, on our design this should be coiled up behind bodywork panels and only our wiring is exposed. In this way the main wiring loom of the bike is not damaged during a crash.

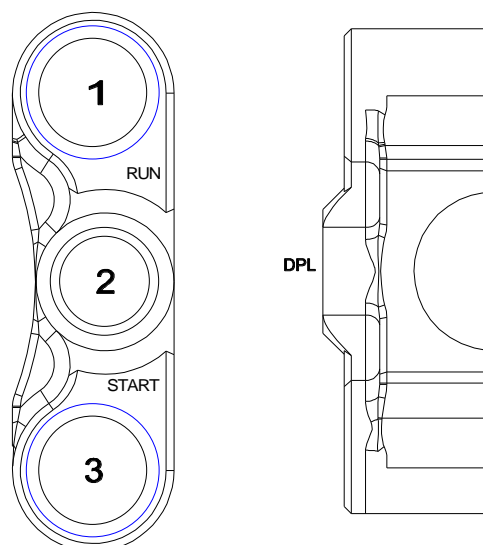

Matching left side switch is available – BD_SW-8B_04

Function:

1	RED	RUN/STOP	Latching
2	BLACK	DPL	Momentary
3	Green	START	Momentary
