

BD_SW_5B_SPx 5 button handlebar race switches

This switch set may be fitted to any race or road motorcycle. Four individual sealed switches are held in a machined aluminium enclosure offering high levels of crash protection as well as electrical integrity.

The user is free to choose the colour and type of switch in any of the 5 locations at the time of ordering except the centre switch that must be a momentary type due to switch length inside the housing.

Custom laser engraving is available as an extra cost, the default version has no markings to give the user greater freedom of use.

Although supplied without any connector, we can fit almost any connector as an extra cost.

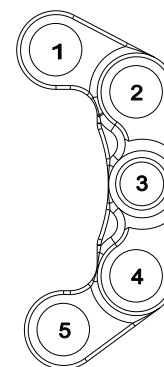

Switch types

Fill in the form below using the choices indicated, the default selections are shown in (brackets).

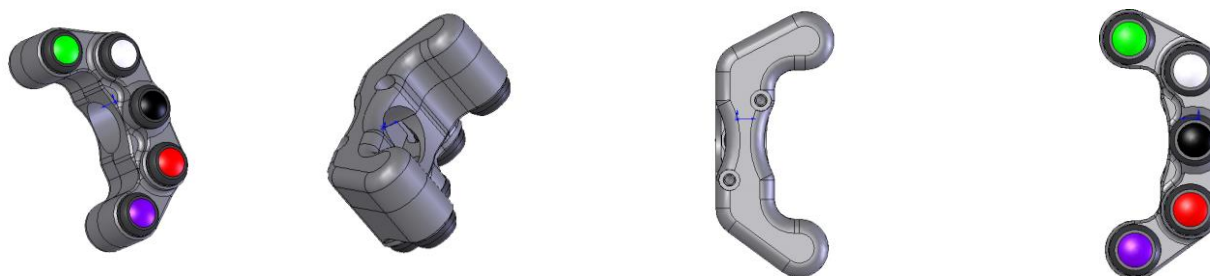

- **Switch type** – Momentary or latching (note – momentary is normally open circuit)
- **Switch colour** – Black / Blue / Green / Red / White / Yellow

	Switch type	Colour
1		
2		
3		
4		
5		

Each switch is independently wired and isolated from all other switches. Alternative wiring arrangements are available on request and at no extra cost.
